

Did You Budget For **REQUIRED** 2012 Carbon Monoxide Detector Replacement?

# Attention! Carbon Monoxide Alarms Don't Last Forever!

## END-OF-LIFE WARNING SOUNDS AFTER 7 YEARS.

*That's two years longer protection than other brands.*

Carbon monoxide (CO) alarms save lives. Kidde carbon monoxide alarms are UL listed and come with a built-in warning that sounds after seven years — letting you know it's time to replace your alarm.

### What happens in 7 years?

- Seven (7) years after the initial power up, CO alarms will “chirp” every 30 seconds to indicate that it is time to replace the alarm.
- Replace the alarm immediately!
- Tenants and homeowners will not be protected. Alarms will not detect carbon monoxide in this condition.

### What is end-of-life?

- UL approved alarms are required to have the warning as a safety precaution.
- Electro-chemical sensor has a finite life.
- Kidde CO alarms have a seven year life— 40% longer than competitive brand alarms.
